Lightspeed Color Accelerator

Whether depositing or lifting, Lightspeed Color Accelerator has been designed to speed-up the processing time of most hair color and lightening services, allowing for faster and more efficient color development. Used in your formulations, it will aid in grey coverage, prevent fading, enhance the performance of hair color and lightening products, hydrate the hair strand, and improve perm retention.

LIGHTSPEED COLOR ACCELERATOR

Salon Price: \$16.00
2.03 fl. oz. (60ml)

\$16

DIRECTIONS

There are a variety of ways to use the Lightspeed Color Accelerator:

1. Add Lightspeed Color Accelerator to any color formulation, following the manufacturer's suggested formulating instructions and process as usual. This approach provides better grey coverage, eliminates fading, and hydrates the hair strand.

Optional:

NO ADDITIONAL HEAT: Add Lightspeed Color Accelerator into your color formulation, apply to the hair, then cover the hair with a processing cap, (do not punch holes in the cap), processing time should be cut in half using only the client's body heat.

PROCESSING WITH LOW HEAT: Add Lightspeed Color Accelerator into your color formulation, apply to the hair, punch 10 -15 small holes into a plastic processing cap with your foiling comb, apply cap, and place client under a **PREHEATED LOW HEAT** dryer. Processing should be completed in 10 to 15 minutes. There is need for heat during the "cool-down period" when refreshing ends.

1 oz/30ml of color add 5 drops of Lightspeed
2 oz / 60ml of color add 10 drops of Lightspeed
3 oz/ 90 ml of color add 15 drops of Lightspeed
4 oz/120 ml of color add 20 drops of Lightspeed

2. To use with Lightener in Foils or On the Scalp:
Add 17-20 drops, process using a preheated dryer set to **LOW HEAT**, and check regularly to avoid overprocessing.
3. To Improve Perms Retention:
Add 5 drops directly into perm neutralizer, shake vigorously to mix, and apply per perm manufacturer's instructions.
4. To use as an intense hydration treatment:
Mix 20 drops of Lightspeed Color Accelerator with 2 - 4oz of conditioner, apply to the hair, place a plastic processing cap over the head, and sit the client under a preheated dryer set to **Low Heat** for 7-15 minutes.
