

## Why EXO-GROW™ SIP & SUPP Is a Game-Changer

### 1. It Completes the Hair-Regeneration Cycle -Inside and Out

EXO-GROW™ has always repaired and reactivated follicles from the outside with advanced exosome technology.

SIP & SUPP now adds the missing piece — internal support that feeds the same biological pathways from within.

Together, they create a true **inside-out system**:

- The **topical line** rebuilds and stimulates the scalp environment.
- The **SIP & SUPP drink** provides nutrients, adaptogens, and antioxidants that fuel new growth from the inside.

This combination delivers faster, stronger, and longer-lasting results.

### 2.Targets Every Root Cause of Hair Thinning

| Root Cause          | How EXO-GROW™ + SIP & SUPP Work Together   |
|---------------------|--|
| Inflammation        | <ul style="list-style-type: none"><li>• Exosomes calm scalp irritation while adaptogens reduce internal stress hormones.</li></ul>   |
| Poor circulation    | <ul style="list-style-type: none"><li>• Topical actives increase blood flow; nutrients support healthy micro-circulation.</li></ul>  |
| Hormonal imbalance  | <ul style="list-style-type: none"><li>• HLA-G COMPLEXA™ stabilizes local DHT activity; natural ingredients like saw palmetto and reishi help balance hormones system-wide.</li></ul> |
| Nutrient deficiency | <ul style="list-style-type: none"><li>• SIP &amp; SUPP replenishes key vitamins, minerals, and amino acids that fuel keratin and collagen production.</li></ul>                      |
| Stress & cortisol   | <ul style="list-style-type: none"><li>• Adaptogenic ingredients such as ashwagandha and L-theanine reduce stress-related shedding.</li></ul>   |

### 3. Science That Works in Sync

SIP & SUPP was formulated to mirror the biological effects of EXO-GROW™ topicals. Each serving contains:

- **Collagen peptides & amino acids** to strengthen the hair shaft
- **Zinc, biotin, and selenium** to boost follicle metabolism
- **Saw palmetto & reishi mushroom** to naturally support healthy hormone balance
- **Vitamin C and marine antioxidants** to protect the scalp from oxidative stress
- **Adaptogens** to calm the nervous system and reduce cortisol spikes

It's science working in harmony, not two separate products, but one connected regeneration system.

### 4. Faster, Visible Results

When used together, most users notice:

- Less shedding within 3 weeks
- Thicker, fuller appearance within 6 weeks
- Healthier texture and shine after a single 30-day cycle

The exosomes “turn on” the follicles, and the supplement gives them the fuel they need to grow new, strong hair.

### 5. Easy, Modern, Lifestyle-Friendly

The SIP & SUPP format fits seamlessly into daily routines:

- A quick-mix powder or drinkable shot, no capsules to swallow
- Light flavor, low sugar, and hydrating
- Feels like a daily wellness ritual rather than a supplement chore

It turns scalp care into a simple beauty-from-within habit.

### 6. Great for Professionals Too

For salons and distributors, SIP & SUPP expands EXO-GROW™ from a topical line into a **complete wellness brand**.

- Adds an effortless retail add-on for every service
- Encourages repeat purchases (one box = one month)
- Opens new opportunities in wellness, med-spa, and lifestyle retail channels

### Script

**“EXO-GROW™** heals and reactivates your scalp on the outside.

**SIP & SUPP** gives your body the nutrients to keep that growth going from the inside. Together, they help your hair grow stronger, thicker, and healthier, naturally
